

I am Shilpa Khadse and I teach Biology and Environmental science at an International school in Mumbai. I am very happy and proud to have banked my Baby's placental stem cells with Lifecell, to secure her future. Further, I have decided to bank my own stem cells obtained from menstrual blood as insurance. Lifecell has provided me with prompt response and service till date. I am sure that my Baby's and my stem cells will be preserved in appropriate condition (as committed by Lifecell) and will turn out to be life saver when needed.

No one has seen the future, so we do not know what health conditions is in store for all of us. Quite a few of us, invest in various health insurance policies with assured amount for treatment of various illnesses. But what good is the money, if we suffer from an incurable ailment? In such a scenario, these stem cells will be a boon for us.

Life cell is the first stem cell bank in India with the prestigious AABB (American Association of Blood Banks) Accreditation and is also recognized by the Department of Scientific and Industrial Research (DSIR), Govt. of India.

We live in a techno world wherein each day brings to us some new gadget, some new invention, to make our lives better. Stem cell banking, I believe, is a miracle and we must not ignore the future it promises.

Thank you Lifecell, for insuring our future.

Shilpa Arvind, Teacher, Mumbai
